

Emergency Escape Hammer with Seatbelt Cutter

This multi-functional emergency escape tool is designed for vehicles. It features a hardened steel hammerhead for breaking windows and a concealed blade for cutting seatbelts.

Overview

Emergency Escape Tool

This multi-functional emergency escape tool is an essential safety device designed for rapid response in vehicle emergencies. Combining a hardened steel hammerhead for shattering glass with a concealed blade for cutting seatbelts, it ensures quick egress from cars, trucks, and buses. Its durable, compact design allows for easy storage in glove compartments or center consoles, while the high-visibility color ensures it can be located quickly when every second counts.
