

Emergency Lighting Unit with Fluorescent Lamp

This self-contained emergency lighting unit provides illumination during power outages. It features a white plastic housing with a clear protective cover, a test button, and indicator lights.

Product Overview

Reliable Emergency Illumination

This self-contained emergency lighting unit is designed to provide immediate, dependable illumination during unexpected power outages. Featuring a durable white plastic housing and a protective clear cover, it ensures the fluorescent lamp remains safe in various environments. The integrated testing system allows facility managers to easily monitor battery status and overall functionality for consistent operational readiness.
