

Emergency Lighting Unit with Fluorescent Tube

Emergency lighting unit designed for emergency and security applications. It provides illumination during power outages and includes a control panel with indicator lights.

Product Overview

Emergency Lighting Reliability

The TK-2297 emergency lighting unit is a professional-grade solution designed to provide reliable illumination during power outages. It features dual 9W PL tubes and a robust 6V 4Ah rechargeable sealed lead-acid battery, ensuring dependable performance when needed most. With integrated overdischarge and overcharge protection, the unit maintains battery health and operational readiness for critical security and safety applications.

Technical Specifications

Battery Capacity

6 V

Voltage

4 Ah

Capacity

Viewing Angle

288 degrees

Light Source

2 x 9W PL Tubes

Features

Operational Indicators

- Green LED: Power indicator
- Red LED: Charge indicator

Safety Protections

Overdischarge Protection, Overcharge Protection
