

Emergency Medical Service Vehicle

This is a specialized vehicle used for emergency medical services. It is equipped with emergency lights, red cross markings, and a spacious interior for patient care and transport.

Overview

Emergency Medical Service Vehicle

This Emergency Medical Service Vehicle is designed for rapid medical response and patient transport. Featuring a raised roof for increased interior headroom, it allows medical personnel to attend to patients effectively during transit. The vehicle is equipped with high-visibility emergency lighting and distinct markings to ensure safety and recognition in urgent situations.
