

Emergency Power Supply System for Gas Stations and Oil Depots

This emergency power supply system is designed to provide backup power for gas stations and oil depots. It ensures the continued operation of essential services during power failures, offering safety, economy, and noise reduction benefits.

Product Overview

Emergency Power Supply System

This emergency generating set is engineered specifically for reliable backup power in critical environments such as gas stations and oil depots. It features a robust diesel engine coupled with a high-efficiency alternator to provide stable, consistent electrical output. The system includes an advanced control panel for comprehensive monitoring of voltage, current, frequency, and fault diagnostics, ensuring optimal uptime and operational safety.

Technical Specifications

Included Systems

- Robust diesel engine
- High-efficiency alternator
- Advanced control panel
- Integrated cooling system
- Exhaust system
- Fuel system

Monitoring Parameters

Voltage, Current, Frequency, Fault Diagnostics

Operational Features

Ease of Use

Easy Installation • Low Maintenance • Autonomous Operation
