

Emergency Rechargeable LED Bulb

This LED bulb provides illumination during power outages. Its built-in rechargeable battery automatically activates when the main power supply is interrupted.

Overview

Reliable Emergency Lighting

This emergency LED bulb ensures you are never left in the dark during power outages. Featuring a built-in backup battery, it provides over 3 hours of continuous illumination automatically when the main power supply is interrupted. Designed for versatility, it functions as a standard bulb during normal operation and offers a seamless transition to emergency mode without requiring any external tools or apps.

Key Features

Key Features

Up to 3 hours emergency backup • Fast charging technology • Samsung LED technology • Integrated safety design • CE compliant

Applications

Suitable Applications

Home, Office, Restaurant, Hotel, Shop, Camping
