

# Emergency Safety Light with Rechargeable Battery

This emergency light provides illumination during power outages. It has dual adjustable krypton bulbs, a rechargeable lead-acid battery, and a plastic case with wall mounting.

## Overview

### Reliable Emergency Illumination

This emergency safety light is designed to provide dependable illumination during power outages, ensuring safety and visibility when you need it most. Featuring dual krypton bulbs and automatic activation, the unit offers four hours of emergency lighting. It is built with overcharge and overdischarge protection to maintain battery health and operational readiness.
