

Emergency Shut-Off Valve

This high-pressure, large-diameter shut-off valve is designed for emergency flow control in industrial applications. It features a robust construction with a flanged connection for secure installation.

Product Overview

Industrial Emergency Shut-Off Valve

This high-pressure, large-diameter quick cut-off valve is engineered for critical emergency flow control within industrial piping systems. Its robust construction ensures reliability in demanding environments, while the flanged connection design facilitates secure and stable installation. Designed for rapid response, this valve serves as an essential safety component for managing fluid dynamics in large-scale operations.

Technical Specifications

Valve Category

Emergency Shut-Off • Industrial Grade

Connection Type

Flanged

Recommended Applications

Emergency Flow Control, Industrial Piping, High-Pressure Systems
