

Emergency Solar Hand Crank Flashlight with Radio

This multi-functional flashlight is solar-powered and includes a hand crank for manual charging. It is equipped with a built-in radio with an antenna for providing light and communication during emergencies or in remote locations.

Product Overview

Versatile Emergency Preparedness

This multi-functional emergency flashlight is designed for critical situations where traditional power sources are unavailable. It integrates solar charging, a manual hand crank, and a built-in radio with an antenna into a single, compact unit. Ideal for emergency kits and outdoor environments, it ensures you maintain both illumination and communication capabilities.
