Overview

Industrial Emergency Stop Solution

This robust emergency stop switch is engineered for critical safety applications in industrial environments. Featuring a high-visibility, mushroom-shaped red button, it ensures rapid activation during emergency situations to protect both operators and machinery. Built with durable materials, this switch is designed to withstand demanding operational conditions while maintaining reliable performance.

Technical Specifications

Rated Operational Current

10 A

Rated Current

400 V AC

Voltage

Ingress Protection

IP40

Rated Insulation Voltage (Ui)

500 V

Thermal Current (Ith)

10 A

Contact Block

Normally Closed (NC)

Compliance & Standards

Compliance Standards

IEC60947-5-1, EN60947-1
