

Emergency Warning Triangle Reflector Kit

This emergency warning triangle reflector kit alerts oncoming traffic of disabled vehicles or roadside hazards. Constructed from high-impact ABS plastic, it has a fluorescent red reflective surface for maximum visibility, a collapsible design for easy storage, and a stable, weighted base.

Product Overview

Emergency Safety Signaling

The Emergency Warning Triangle Reflector Kit is a high-visibility safety device essential for roadside hazards and disabled vehicles. It is engineered from durable, high-impact ABS plastic to provide long-lasting reliability in critical situations. Featuring a fluorescent red reflective surface, it ensures maximum visibility for oncoming traffic during day or night. The kit is designed for user convenience with a collapsible form factor for storage and a weighted base for improved stability in adverse weather.
