

Emery Grinding Wheels for Metalworking

Emery wheels are designed for grinding, cutting, and polishing applications. The wheels come in different sizes and thicknesses, suitable for use with electric grinders and other power tools.

Product Overview

Versatile Emery Grinding Wheels

These emery grinding wheels are engineered for a variety of metalworking tasks, including precision grinding, cutting, and surface polishing. Designed for compatibility with standard electric grinders and various power tools, they offer reliable performance for both industrial applications and demanding projects. The collection features diverse sizes and abrasive compositions to ensure the right tool is available for specific material removal and finishing requirements.

Technical Specifications

Design Features

- Multiple diameter options
- Variable thickness profiles
- Diverse abrasive material compositions

Usage Environment

Industrial • DIY Projects

Primary Applications

Grinding, Cutting, Polishing

Tool Compatibility

Electric Grinders, Power Tools
