

# Emery Roller for Rice Whitening

Emery rollers are crucial components in rice milling machinery, responsible for whitening and polishing rice grains. Constructed with high-quality emery material, they ensure efficient performance and minimal grain breakage.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Emery Rollers for Rice Whitening

These emery rollers are precision-engineered components designed for vertical rice whitening machinery. Constructed with high-quality emery material, they are essential for the efficient removal of bran layers during the rice milling process. Designed for consistency and durability, these rollers help ensure optimal grain quality while minimizing breakage during operation.

## Technical Compatibility

### Available Grit Variations

- GC
- Black

### Compatible Machine Models

VTA5, VTA7, VTA10, VTA12, VTA15, VTA20

## Product Features

### Primary Application

Agricultural product primary processing machinery

### Component Purpose

Yes

## Logistics & Handling

### Packaging Options

Standard Packaging • Wooden Plate (VTA15)
