

EN125 57mm Big Bore Cylinder Kit

This kit increases the engine's capacity to 125cc with a 57mm bore and air cooling. It includes a cylinder, piston, piston rings, wrist pin, and circlips.

Product Overview

Performance Upgrade Kit

This 57mm big bore cylinder kit is designed for EN125 motorcycles to effectively increase engine displacement and power output. Engineered for durability, the kit features high-quality materials to ensure efficient heat dissipation and reliable performance. It serves as a direct replacement for original components, making it a straightforward upgrade for professional mechanics and enthusiasts alike.

Technical Specifications

Bore Diameter	57 mm
Engine Capacity	125 cc
Cooling Type	Air
Stroke	4
