

EN598-2007 Standard Ductile Iron Pipes

These ductile iron pipes are manufactured to EN598-2007 standard for sewage and water applications. The pipes offer high strength and corrosion resistance and are suitable for underground installation.

Product Overview

High-Performance Ductile Iron Piping

These ductile iron pipes are engineered to the EN598-2007 standard, specifically designed for robust sewage and water infrastructure applications. Offering exceptional durability and corrosion resistance, they are suitable for demanding underground installations. With a wide range of available diameters and lengths, these pipes provide a reliable solution for large-scale municipal and industrial water management systems.

Technical Specifications

Available Lengths

- 6 meters
- 8.15 meters

Annual Production Capacity

38000 km

Pipeline Capacity

Standard Compliance

EN598-2007, ISO 9001, ISO 14001, GB/T28001

Diameter Range

DN80 - DN2600mm

Quality & Certification

Quality Certifications

BV Certified • KS Certified • ISO Certified
