

# Enclosed Laser Engraving and Marking Machine

This enclosed laser engraving machine is designed for engraving and marking on stainless steel and other materials. It functions as a steel carving CNC router machine, providing precision and accuracy in various engraving applications.

## ADDITIONAL IMAGES

## Product Overview

### Enclosed Laser Engraving and Marking System

This enclosed laser engraving and marking machine is a versatile CNC solution designed for high-precision carving on a wide array of materials, including stainless steel, gold, and silver. Its fully enclosed design prioritizes operator safety while effectively containing fumes, making it an ideal choice for both professional workshops and educational environments. With robust construction and reliable performance, this system is engineered to handle intricate patterns and detailed marking tasks with ease.

## Technical Specifications

### Physical Dimensions

**500 mm**

Width

**710 mm**

Depth

**675 mm**

Total Height

**60 mm**

Top Component Height

**Net Weight**

60 kg

## Applications

### Compatible Materials

- Stainless Steel
- Gold
- Silver
- Bamboo
- Paper
- Plastic
- Wood
- Glass
- PVC

### Industry Applications

Electronics, Automotive, Aerospace, Food & Beverage, Medical Instruments, Advertising, Solar PV

## Service & Warranty

### Warranty Coverage

2-Year Warranty • Free Repair (Non-human factor) • Lifetime Repair Support

### Support Services

- 24-Hour Technical Support
- On-site Engineer Service
- Remote Internet Training
- Multi-language Service
