

Enclosed Lifeboat for Marine Safety

This enclosed lifeboat is designed for maritime safety. It features a rigid, buoyant structure with windows for visibility and safety markings, commonly used on ships and offshore platforms for emergency evacuation.

Product Overview

Professional Marine Evacuation Solutions

This range of high-quality lifeboats is engineered for critical maritime safety, suitable for both cargo vessels and oil tankers. Available configurations include totally enclosed, partially enclosed, open, and free-fall designs to meet diverse emergency evacuation requirements. Each unit is built to rigorous international standards, ensuring reliability for offshore platforms and commercial shipping operations.
