

Enclosed Magnetic Starter with Overload Protection

This enclosed magnetic starter controls motors in machinery and industrial applications. It offers overload and undervoltage protection to safeguard motors.

Product Overview

Reliable Motor Control Solution

This enclosed magnetic starter provides a robust solution for motor control applications in industrial environments. Engineered with integrated start and stop pushbuttons, it ensures convenient operation while maintaining high safety standards. The unit is designed to safeguard your equipment, featuring essential protection against both overload and undervoltage conditions.

Technical Features

Interface

- Start Pushbutton
- Stop Pushbutton

Protection Capabilities

Overload Protection, Undervoltage Protection

Design & Application

Primary Applications

Machinery • Industrial Applications • Motor Control

Enclosure Design

Robust enclosed design for environmental protection
