

End Mill Resharpener Machine

This portable grinder efficiently resharpens 2-, 3-, and 4-flute end mills. An optional fixture set allows for grinding 5-flute end mills, while adjustable settings control chip flute width and depth.

Product Overview

Precision Resharpener Solution

The X3 is a versatile, portable grinding machine engineered to extend the lifecycle of milling tools by providing professional-grade resharpener. It supports 2, 3, and 4-flute end mills with optional compatibility for 5-flute designs, ensuring broad material processing capabilities. Its adjustable lifting knob wheel allows for precise control over chip flute depth and width, effectively reducing cutting resistance and improving overall sharpness.

Technical Specifications

Grinding Capabilities

- Direct end blade opening with tungsten rod
- Adjustable milling chip flute width
- Adjustable milling chip flute depth
- Axial knurl grinding

Compatible Flute Counts	2-flute, 3-flute, 4-flute, 5-flute (optional)
