

End Mill Sharpener 4-14mm Grinding Range

This end mill sharpener is a versatile grinding device applicable for cutting operations requiring different angles. It facilitates extensive cuts over various materials, tailored to specific industrial uses.

Product Overview

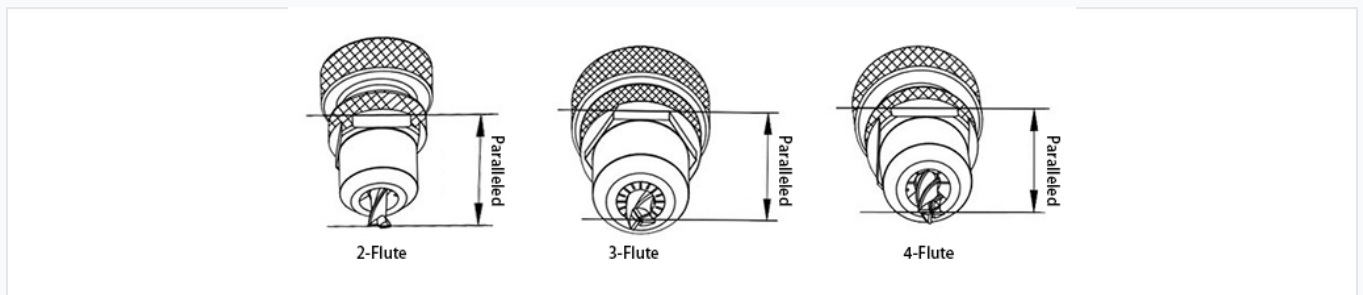

Precision grinding tool for sharpening end mills with high accuracy.

Precision End Mill Sharpening

This versatile grinding device is designed for efficient sharpening of cutting tools within a 4-14mm range. Engineered for both professional workshops and tool rooms, it enables high-precision sharpening at various angles to maintain optimal cutting performance. Its robust construction ensures consistency and durability, helping to extend the operational life of your tooling inventory.

Technical Specifications

Capable of sharpening 2, 3, and 4-flute end mills with consistent results.

Grinding Range	4mm - 14mm
Spindle Speed	4800 RPM
Power Consumption	180 W
Operating Voltage	220 V
Point Angle Range	0° - 5°

Physical Attributes

Net Weight	14 KG
Dimensions (L x W x H)	35 x 23 x 24 cm

Equipment & Accessories

Standard Model

Grinding Wheel (HSS)*1 Collets*6 Fixture Group *2

Standard configuration including CBN wheel and collet set.

Standard Equipment

- CBN Grinding Wheel for HSS
- Set of 6 Collets
- Two-piece Fixture Group

Included Collet Sizes	4mm, 6mm, 8mm, 10mm, 12mm, 14mm
