

Energy-Efficient Compact Fluorescent Lamp

This compact fluorescent lamp is an energy-efficient alternative to incandescent bulbs. It features a folded tube design, ensuring efficient light output and a long lifespan.

Product Overview

Energy-Efficient Lighting Solution

This Compact Fluorescent Lamp (CFL) is engineered as a high-efficiency alternative to traditional incandescent bulbs. Featuring a unique folded tube design, it maximizes light output while maintaining a compact form factor suitable for various fixtures. Designed for both residential and commercial environments, this lamp offers a reliable, long-lasting illumination solution that significantly reduces the need for frequent replacements.

Technical Specifications

Application Areas

- Residential General Illumination
- Commercial Lighting

Lamp Type	Compact Fluorescent Lamp (CFL)
Design Features	Folded Tube Design, Compact Size, Energy-Efficient

Performance

Key Performance Metrics
