

Energy-Efficient LED Bulb

This LED bulb is an energy-efficient lighting solution suitable for various applications. It features a standard screw base and provides bright, consistent illumination while consuming minimal power.

Overview

Energy-Efficient Lighting Solution

The DJ-E28 LED bulb is a high-performance lighting solution engineered for both residential and commercial applications. By combining consistent, bright illumination with minimal power consumption, this bulb delivers significant energy savings and operational efficiency. Designed for longevity, it reduces the frequency of replacements, offering a cost-effective and environmentally friendly choice for professional lighting environments.

Technical Specifications

Model Number	DJ-E28
Base Type	Standard Screw Base

Performance Metrics

Application Suitability	Residential • Commercial
Key Features	Energy-Efficient, Long Lifespan, Consistent Illumination, Cost-Effective
