

Energy Efficient LED Bulb

This LED bulb is designed for energy efficiency and long-lasting performance. Its compact size and bright light output make it suitable for various lighting applications.

Product Overview

Energy Efficient LED Technology

This LED bulb utilizes original patented technology to deliver high luminous efficiency with minimal lumen depreciation. Designed for superior performance, it features an optical PC lamp-house with 90% light transmittance and an advanced convection design for optimal heat dissipation. The flicker-free, 360-degree illumination ensures soft, uniform light that is gentle on the eyes, while the constant current driver provides stable, reliable operation.

Technical Specifications

Lighting Angle	360 degrees
Optical Transmittance	90 %
Driver Type	Constant current driver

Features

Key Features

- Flicker-free design
- High luminous efficiency
- Low lumen depreciation
- Enhanced heat dissipation
- Soft lighting

Compliance	Energy Efficient, Stable Performance
