

# Energy Efficient LED Tube Light

This LED tube is an energy-efficient replacement for fluorescent tubes. It features a robust construction and provides even light distribution.

## Overview

### Energy-Efficient Illumination

This LED tube light is designed as a high-performance, energy-saving replacement for traditional fluorescent lighting. It delivers soft, gentle illumination that prioritizes eye comfort while maintaining high efficiency. Built for versatility, it is an ideal lighting solution for professional environments including offices, supermarkets, workshops, and public transit areas.

## Technical Specifications

### Lumen Efficiency

**100 lm/w**  
Efficiency

Power Factor	>0.5 / 0.9
Color Rendering Index (CRI)	75 CRI
Input Voltage Range	AC180-265V, AC100-265V

## Features

### Key Benefits

- Energy saving design
- Soft and gentle light output
- Eye protection technology

## Applications

### Recommended Applications

Office • Hall • Supermarket • Metro • Workshop
