

Energy-Efficient Three-Phase Asynchronous Motor

This energy-efficient three-phase asynchronous motor is designed for diverse industrial uses. It is constructed with high-quality materials, ensuring reliable performance and an extended service life.

Overview

High-Efficiency Industrial Performance

This three-phase asynchronous motor is engineered for reliability and consistent performance in demanding industrial environments. It features a robust design that supports continuous duty operation while maintaining high energy efficiency. By reducing overall operating costs, this motor serves as an ideal solution for various heavy-duty machinery applications.

Technical Specifications

Rated Power

2 KW

Rated Power

Speed	1410 r/min
Efficiency	80 %
IP Rating	IP55
Cooling Method	IC 411
Compliance	CE

Electrical Ratings

Voltage Ratings

- 220 V
- 380 V

Rated Current	3.57 A
Power Factor	0.75
Frequency	50 HZ
