Product Overview

Engine Connecting Rod Bearing

These connecting rod bearings are precision-engineered to provide a smooth and durable interface between the connecting rod and the crankshaft. Designed specifically for the H20 engine platform, these components ensure optimal engine performance and longevity. Each set is manufactured to meet or exceed original equipment specifications for fit and function, ensuring reliable operation under varying loads.

Technical Details

Size

STD

Compatible Engine

H20

Part Markings

HR21D, CLS, HK

Compatibility

Supported Engine Brands

- Mercedes-Benz
- Fiat
- Iveco
- Caterpillar
- Toyota
- Nissan
- Isuzu
- Cummins
- BMW
