

Engine Coolant Thermostat Housing

This thermostat housing is designed for automotive engine cooling systems. Constructed from durable materials, it regulates engine temperature by controlling coolant flow.

Product Overview

High-Performance Engine Coolant Thermostat Housing

This thermostat housing is a critical component for engine cooling systems, engineered to maintain optimal operating temperatures by precisely controlling coolant flow. Constructed from durable composite materials, it is designed to withstand high thermal stress and pressure to prevent leaks and ensure long-term reliability. Its versatile design features multiple ports for hoses and sensors, making it an ideal replacement solution for a wide range of automotive models.

Compatibility

OEM Reference Numbers

- 1336.R8
- 1336.S4
- 1336.T0
- 1336.V0
- 1336.V4
- 1336.W7
- 1336.Y8
- 9643211880
- 9808647180

Engine Compatibility	2.0HDI
Supported Models	Berlingo, Saxo, Xantia, Xsara, 106, 205, 206, 306, 309, 405, 806, 605, Partner

Design Features

Product Highlights

Heat Resistant • Pressure Resistant • Integrated Sensor Ports • Precision Coolant Flow

Construction Material	Durable black plastic composite
