

# Engine Cooling Radiator

This high-performance radiator is designed for efficient engine cooling. It features a durable core construction with optimized fin density for maximum heat dissipation.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Engine Cooling Radiator

This high-performance engine cooling radiator is precision-engineered for optimal thermal management and engine protection. Designed to meet or exceed original equipment standards, it ensures reliable heat dissipation even under demanding automotive conditions. Its robust core construction and optimized fin density facilitate efficient temperature regulation, effectively preventing overheating and maintaining peak vehicle performance.

## Technical Specifications

Core Size	710*1008 mm
Header Plate Size	91.5/91.5*1046.4 mm

## Cross Reference

OEM Number	55018
DPI Reference	55018
Nissens Reference	55018

## Application Details

Series Compatibility	2-Series
Model Years	88-96
