

Engine Cylinder Head Gasket for Mitsubishi 4D30

This cylinder head gasket is designed for Mitsubishi 4D30 engines. It provides a tight seal between the cylinder head and the engine block to maintain compression and prevent leaks.

Product Overview

High-Performance Engine Gasket

This premium cylinder head gasket is engineered specifically for the 4D30 engine model. Designed to provide a reliable seal between critical engine components, it ensures optimal combustion efficiency and prevents leaks under high-pressure conditions. Constructed from durable stainless steel and metal, this component is built to withstand extreme thermal stress, promoting engine longevity and consistent performance.

Compatibility & Specifications

Compatible Engine Types

Diesel • Gasoline

Engine Model	4D30
OEM Number	ME 011045
Overhaul Full Set No.	ME999012

Materials & Construction

Material	Stainless Steel, Metal
