Product Overview

Engine Intake Manifold

This engine intake manifold is engineered to efficiently distribute the air-fuel mixture to the engine cylinders, optimizing airflow for enhanced combustion efficiency. Constructed from durable, heat-resistant polymer, it features precisely engineered runners and integrated mounting points for secure installation. Designed to maintain optimal engine performance, it includes high-quality sealing components to prevent leaks and support consistent power output.

Technical Specifications

Certifications

ISO/TS16949

OE Numbers

11618511363, 11617800088, 8511363, 7800088, 8507233, 7811299

Size

Standard Size

Logistics & Supply

Daily Supply Ability

600 Sets

Sets per Day

Lead Time Table

Quantity (Sets)	Est. Time (Days)
1 - 5000	30
> 5000	To be negotiated

Warranty

1 year

Place of Origin

China

Packaging

Neutral package: each one in a carton with foams inside.
