

Engine Oil Filter

This oil filter is designed for efficient engine lubrication and protection. It features durable construction and advanced filtration media to remove contaminants and ensure optimal oil flow.

Product Overview

High-Performance Engine Oil Filter

This high-performance oil filter is engineered to provide superior engine lubrication and protection. Featuring a durable construction and advanced filtration media, it effectively removes contaminants to ensure optimal oil flow and engine longevity. It is specifically designed as a reliable replacement component for various automotive applications.

Technical Specifications

Component Type

Oil Filter • Engine Component

OEM Number

8173-23-802

Compatible Vehicle Series

MAZDA
