Product Overview

High-Performance Engine Oil Filtration

This engine oil filter is engineered to maintain optimal engine health by effectively removing contaminants and impurities from the oil supply. Designed specifically for heavy-duty truck applications, it features a robust construction that ensures reliable protection and extended engine service life. Its durable design makes it an essential component for maintaining consistent engine performance under demanding operational conditions.

Technical Specifications

Certifications

ISO 9001

Part Number	VG1540080311
Model ID	JX0818
Vehicle Type	Truck
Standard	Standard
