

Engine Piston

This precision-engineered piston is designed for internal combustion engines. It features multiple ring grooves for optimal sealing, a robust piston pin bore, and durable aluminum alloy construction for efficient heat dissipation.

Product Overview

Precision-Engineered Engine Piston

This precision-engineered piston is designed for internal combustion engines, focusing on durability and efficient heat dissipation. Manufactured from high-quality aluminum alloy, it reduces overall weight while maintaining the structural integrity needed to withstand high pressures and temperatures. The design includes multiple ring grooves for optimal sealing and oil control, ensuring reliable engine performance.

Technical Specifications

Material	Aluminum alloy
Design Features	High heat dissipation, Multiple ring grooves, Robust piston pin bore

Kit Contents

Included Components

- Piston
- Piston rings
- Wrist pin
- Circlips

Performance

Key Performance Indicators

1 High Sealing Efficiency	1 Optimized Weight Reduction
