

Engine Piston Kit with Rings and Wrist Pin

This piston kit includes a piston, a set of piston rings, and a wrist pin. The kit is designed for use in internal combustion engines.

Product Overview

High-Performance Engine Piston Kit

This comprehensive engine piston kit is engineered for optimal performance and durability in internal combustion engines. It includes a precision-machined aluminum alloy piston, a complete set of piston rings, and a high-strength wrist pin. The design features strategic cutouts to reduce reciprocating mass while enhancing lubrication, ensuring reliable operation under demanding conditions.

Technical Specifications

Included Components

- Piston
- Wrist Pin
- Compression Rings
- Oil Control Ring
- Scraper Ring

Material Composition

Aluminum Alloy

Design Features

Weight Reduction Cutouts, Improved Lubrication Channels, Combustion Chamber Sealing

Compatibility

Engine Type

Internal Combustion Engines
