

Engine Piston Ring Set

Piston ring sets are essential components for sealing the combustion chamber and ensuring efficient combustion. These rings transfer heat from the piston to the cylinder wall and regulate oil consumption.

Product Overview

High-Performance Piston Ring Set

This precision-engineered piston ring set is designed for optimal engine sealing and durability, ensuring efficient combustion and reduced oil consumption. Engineered to withstand high temperatures and pressures, these components are essential for maintaining engine longevity and performance. The set is specifically tailored for compatibility with Perkins 4.236 and 6.354 engine models.

Engine Compatibility

Cylinder Configuration

- 4 cylinders
- 6 cylinders

Compatible Engine Models

PERKINS 4.236, PERKINS 6.354

Technical Specifications

OEM Reference Number	41158041
Diameter	98.48 mm
Ring Sizes	2.38 + 2.38 + 2.38 + 6.35 + 6.35 mm

Material Composition

Material Specifications

Component	Material Grade
1st Ring	KV1
2nd Ring	K1
3rd Ring	K1
4th Ring	K1
Oil Ring	K1 DSF
