

Engine Piston Ring Set

This piston ring set is designed for optimal engine sealing and performance. Its durable construction includes compression rings, oil control rings, and expander segments for efficient oil management.

Product Overview

High-Performance Engine Piston Ring Set

This engine piston ring set is engineered for optimal sealing and engine performance. Featuring durable construction and advanced materials, these rings are designed to reduce friction and extend the operational lifespan of your engine. The set includes a comprehensive combination of compression rings, oil control rings, and expander segments to ensure efficient oil management and superior combustion chamber sealing.

Technical Specifications

Included Components

- Compression rings
- Oil control rings
- Expander segments

Key Features

High-performance, OEM specification compliant, Reduced friction, Extended lifespan
