Product Overview

High-Durability Engine Valve Cover

This premium engine valve cover is engineered to provide a robust protective seal for the engine's valve train, effectively preventing oil leaks and environmental contamination. Constructed from high-temperature resistant, durable plastic, it is designed to withstand the rigorous thermal cycles and harsh conditions of the engine compartment. This direct-replacement component ensures optimal engine performance, longevity, and a precise fit for various 1.6T and 2.0T engine configurations.

Compatibility Details

Vehicle Application Matrix

Engine Type	Compatible Models
2.0T	Various Peugeot & Citroen
1.6T	308, 3008, C5, C4L

Compatible Part Numbers

0248R6, 9805712480, 9812828980, 9818344780, V759886280

Technical Specifications

Design Highlights

- Integrated oil filler cap port
- Engineered for direct OEM replacement
- Reinforced mounting points
- Advanced ventilation channels

Material

High-temperature resistant polymer
