

Engineering Submersible Pump for Irrigation and Drainage

This submersible pump is widely used for farm field irrigation and garden water spraying. It is also suitable for under-well water pumping and water supply & discharge systems of mines, industrial, and civil buildings.

Product Overview

Versatile Engineering Submersible Pump

This high-performance submersible pump is engineered for demanding irrigation and drainage tasks across agricultural, industrial, and civil sectors. Built for durability and reliability, it excels in under-well pumping, water supply systems, and dewatering applications. With its robust construction and wide range of configurations, it provides a consistent solution for high-volume and high-head fluid management.

Key Features

Applications

Farm Irrigation, Garden Spraying, Well Water Pumping, Mining, Industrial Buildings, Civil Infrastructure

Technical Specifications

Model Specifications

Model	Power (kW)	Flow (m ³ /h)	Head (m)	Outlet (inch)
QXN5-36/2-1.5D	1.5	5	36	1"
QXN5-52/3-2.2D	2.2	5	52	1"
QXN10-36/2-2.2A	2.2	10	36	1.5"
QXN10-50/3-3A	3	10	50	1.5"
QXN12.5-40/2-3A	3	12.5	40	2"
QXN12.5-160/8-13	13	12.5	160	2"

Motor Speed

2850 r.p.m

Voltage

380 V
