

# Engineer's, Ball Peen, and Geological Hammer Set

This set includes engineer's hammers with different handle designs, a ball peen hammer for metalworking, and a geological hammer for rock sampling. Each hammer is constructed from hardened steel and designed for specific tasks.

## ADDITIONAL IMAGES

## Product Overview

### Professional Hammer Set

This versatile hammer set includes specialized tools for engineering, metalworking, and geological applications. Designed for durability and precision, the heads feature fully polished finishes with protective rubber sheaths. Each tool is manufactured under strict quality management systems to ensure reliability in demanding professional environments.

## Quality & Standards

### Certifications

ISO 9001

## Technical Specifications

### Construction Features

- Hardened steel construction
- Rubber sheath protection
- Ergonomic handle designs

### Head Finish

Fully polished

### Standard Head Color

Golden

### Customization

Head color can be painted per customer requirement

## Applications

### Included Tool Types

Engineer's Hammer • Ball Peen Hammer • Geological Hammer

### Primary Uses

- Metalworking (shaping, flattening, riveting)
- Geological sampling and rock breaking
- General striking tasks
