

EPE Foam Board Guillotine Cutter

This guillotine machine is designed for precise and efficient cutting of EPE foam boards. It features adjustable settings for customized cutting depths and angles.

Product Overview

Precision EPE Foam Cutting Solution

The EPE Board Guillotine Machine is engineered for the precise and efficient processing of Expanded Polyethylene (EPE) foam boards. Featuring a robust cutting mechanism and a sharp guillotine blade, this machine delivers clean, accurate cuts essential for high-quality protective packaging and insulation production. Its stable worktable and adjustable settings accommodate various board sizes, while integrated safety features ensure reliable operation in demanding industrial environments.

Technical Specifications

Adjustable Settings

- Cutting depth
- Cutting angle

Cutting Mechanism	Guillotine blade
Compatible Materials	EPE Foam, Expanded Polyethylene

Safety & Compliance

Safety Features

Blade Guards • Emergency Stop

Applications

Ideal Applications

- Protective packaging production
- Insulation material manufacturing
