

Equipment Indicator Light

This equipment indicator light is used for monitoring and control in industrial settings. It features multiple BNC connectors, a display screen, and various indicator lights and buttons.

Product Overview

Professional Monitoring Workstation

This advanced equipment indicator light serves as a centralized monitoring and control interface for technical environments. Designed for efficiency, it features a clear display screen, multiple BNC connectors for robust signal input, and an intuitive button-control layout. It is specifically engineered as an indoor-type optical workstation, ensuring reliable status signaling and operational management.

Technical Specifications

Signal Inputs

- BNC Connector 1
- BNC Connector 2
- BNC Connector 3
- BNC Connector 4

Model Number

GW5802F-HA

Features

Installation Type

Indoor • Workstation

Indicator Functionality

Visual Status, Control Interface, Signal Monitoring
