

Espresso and Cappuccino Coffee Maker

This espresso and cappuccino maker features a 15 bar high pressure pump. It has a 0.8L detachable water tank and can use coffee pods or ground coffee.

Product Overview

Professional Espresso Experience

This versatile espresso and cappuccino maker is designed for high-quality coffee extraction, featuring a 15-bar high-pressure pump for optimal flavor. With its durable die-casting aluminum boiler and dual-stainless filter system, it delivers consistent results whether you prefer coffee pods or ground coffee. The user-friendly design includes a detachable frothing nozzle for milk-based drinks and a convenient cup-warming plate, making it an efficient addition to any kitchen or office coffee station.
