

Espresso Machine with Rapid Heating Boiler

This espresso machine features a stainless steel boiler for rapid heating. It is equipped with a selector knob for espresso brewing, steam generation, and standby mode, plus a removable drip tray and steam wand.

Product Overview

Professional Espresso Experience

This compact espresso machine is designed for efficiency and ease of use, featuring an instant heating system for quick operation. With a consistent 15-bar pump pressure, it delivers high-quality espresso extraction suitable for both coffee grounds and coffee pods. The machine includes a versatile steam wand for milk frothing, making it an ideal choice for creating a variety of cafe-style beverages at home.
