

Espresso Machine with Steam Wand

This professional-grade espresso machine features a high-pressure pump for optimal extraction. It also includes a steam wand for frothing milk, a removable water reservoir, and a drip tray.

Product Overview

Professional Espresso Experience

This professional-grade espresso machine is designed for high-quality coffee extraction, featuring a durable stainless steel housing that ensures longevity in busy environments. Equipped with a high-pressure pump and an integrated steam wand, it offers precise control for both brewing and milk frothing. Its user-friendly design includes a removable water reservoir and a convenient drip tray, making it an efficient choice for any commercial or professional setting.
