

Espresso Maker with Milk Frothing Capability

This espresso maker features a stainless steel and black design. It is equipped with a portafilter holder and a steam knob for frothing milk.

Overview

Professional Espresso Experience at Home

This espresso coffee maker combines a sleek stainless steel and black aesthetic with robust functionality, perfect for home or small office environments. It features intuitive controls for single and double espresso shots, alongside a dedicated steam function for frothing milk. Designed for convenience, the unit includes a cup warming surface, a removable drip tray for easy cleaning, and a secure portafilter locking mechanism.
