

Etched Stainless Steel Ruler

This precision steel ruler is designed with etched graduations for accurate measurements. Constructed from durable stainless steel, it offers both imperial and metric scales with clearly marked increments for versatile use.

Product Overview

Professional Precision Instrument

This high-quality stainless steel ruler is engineered for accuracy and durability in demanding work environments. Featuring clear, etched graduations, it provides both imperial and metric scales to cater to global engineering and drafting standards. Its robust construction ensures long-lasting performance and reliable resistance against corrosion.

Technical Specifications

Scale Types

- Metric (millimeters)
- Imperial (inches)

Primary Applications

Engineering • Drafting • General Measurement

Construction Material

Stainless Steel
