

European AC Power Plug

This European AC power plug connects electronic devices to mains power. It has two round pins and a grounding contact, ensuring a reliable and safe electrical connection.

Product Overview

Professional Grade European Power Connection

This standard European AC power plug is engineered for secure and reliable connection to the mains power supply. Featuring dual round pins and an integrated grounding contact, it is constructed from high-quality molded materials for optimal insulation and durability. The design ensures consistent electrical safety, making it an ideal choice for diverse electronic applications requiring reliable grounding.

Technical Specifications

Safety Compliance

- Molded construction for insulation
- Integrated grounding contact
- Shock prevention design

Pin Configuration	2-Pin, Grounding Contact
Cable Color	Grey
