

European Power Strip with Safety Covers

This power strip features multiple European-style outlets. Each outlet includes a yellow safety cover for child protection.

Product Overview

Safety-First Power Distribution

This European-style power strip is engineered with a primary focus on safety and reliability in professional or residential environments. Each individual outlet is equipped with integrated yellow safety covers, providing essential protection against accidental contact and ensuring a secure connection. Designed for standard European electrical systems, this unit offers a robust solution for managing multiple devices while maintaining high safety standards.
