

European Standard Electrical Socket and Switch Set

This European standard series features optimized design and excellent materials. Precision manufacturing and rigorous testing ensure consistent product quality.

Overview

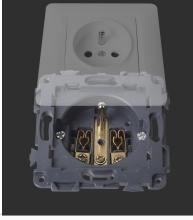

The EOS Series provides a clean, minimalist aesthetic suitable for modern interiors.

EOS Series Electrical Solutions

The EOS series offers a comprehensive range of European standard switches and sockets designed for modern residential and commercial interiors. These components are engineered with high-precision manufacturing and rigorous testing to ensure consistent quality and reliable performance. Featuring a minimalist aesthetic, the series is available in multiple finishes to seamlessly match various interior design styles.

Technical Specifications

High quality phosphor copper with excellent conductivity and strong elasticity.

Internal phosphor copper contacts provide excellent conductivity and elasticity for reliable power transmission.

Rated Current

13 A

Switch

16 A

Socket

Mechanical Life

Component	Cycles
Switch	40000
Socket	10000

Rated Voltage

220V-250V

Materials & Design

Flame-Retardant PC, safe and durable.

High-quality flame-retardant PC material ensures safety and durability, with heat resistance up to 850°C.

Available Colors

White • Champagne • Silver • Wooden

Construction Materials

PC, Copper, Glass, Aluminum, Wood

Compliance & Logistics

Certifications

CE

Warranty

5 years

Packaging Details

10pcs/box, 100pcs/ctn
