

European Standard Power Strip with Timer

This power strip is designed with six outlets and a timer dial for automated on/off switching. It is suitable for standard European-style plugs and operates on AC voltage.

Product Overview

Smart Energy Management

This European standard power strip is designed to optimize energy efficiency for indoor applications, including refrigeration and ventilation systems. Featuring six outlets and a precise manual timer dial, it enables automated on/off scheduling for multiple connected devices. Its robust build and grounding contact ensure safe, reliable performance for professional power management needs.

Technical Specifications

Number of Outlets	6
Plug Standard	European (2-pin with grounding contact)
Timer Control	Manual rotary dial

Features

Key Features	Energy Efficient, Automated Switching, Indoor Use, Grounding Protection
